## **AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

- 1. **(Original)** A method for measuring the activation of an effector cell belonging to the immune system, which may or may not be transformed, by means of a monoclonal (MoAb) or polyclonal antibody characterized in that it comprises bringing CD16 receptor-expressing cells into contact in a reaction medium in the presence of the antibody and of the antigen for said antibody, and measuring the amount of at least one cytokine produced by the CD16 receptor-expressing cell.
- 2. (Original) The method as claimed in claim 1, characterized in that the effector cell is a CD16 receptor-expressing Jurkat cell.

## 3.-24. (Cancel)
